

Active Vehicle Cradle

CipherLab RS50

The Active Vehicle Cradle is the perfect solution to integrate and use your CipherLab RS50 in your vehicle. The unique and patented robust design of the active vehicle cradle keeps your handheld device in place.

The cradle has a 1,5m power cable with cigarette plug lighter, integrated in the cradle is an efficient charging circuit, suitable for 12V and 24V, which powers and charges your handheld device. The charger is specially developed for professional use where reliability and quality are very important. The charger keeps your device charged and ready for use in- and outside your vehicle.

The cradle is developed to ensure that the handheld device is kept in place but is still easy to remove. This is achieved with special fixtures that keep the handheld device firmly seated on the cradle connector while driving on bumpy roads. This also protects the handheld device connector and cradle connector from being damaged.

The perfect solution for the professional user, who wants to integrate his CipherLab RS50 in his car, van, truck, bus or forklift.
