

12-Slot Desktop Cradle

Charge and store upto 12 handheld devices

The CarComm 12-Slot Desktop Cradle will help you keep your mobile devices charged and ready to go. The cradle can charge up to 12 handhelds at the same time, ideal for smaller and mid-size companies.

With the unique and patented robust design, the 12-Slot Desktop Cradle can be placed safely on your desk, cabinet or any other flat surface.

The device specific cradles are developed to ensure that the handheld device is kept in place but is still easy to remove. This is achieved with special fixtures that keep the handheld device firmly seated on the cradle connector, this to protect the handheld device connector and cradle connector from being damaged.

The device specific cradles are inter-changeable and can easily be swapped, serviced or replaced. This by unplugging the molex connector and removing the cradle from the 2T plate. The 12-Slot Desktop Cradle is compatible with 110/240V. The power supply has an output of 5V / 24A / 120W and has an integrated current limiter per slot, but also over-voltage, overload, short-circuit and temperature protection. This to ensure your device is securely charged when inserted into the cradle.

Features:

- Quick and easy docking for your mobile devices
- Charges up to 12 handheld devices at the same time
- Keeps your handheld devices charged and ready to go
